Sommario/riassunto

This book can be viewed as a series of investigations into the ongoing imbrications of the practices of art, ethics and education as conducted within each author's specific context of practice as artist, educator, researcher. It constitutes an international anthology of explorations that are by no means exclusive but conscious of the ongoing iterations, mutations and individuations of relations between art, ethics and education, which, in turn, seek to expand how we might conceive these terms as practices. This ongoing evolution reminds us that as practices art, ethics and education are always incomplete processes affected by and affecting their specific milieus and environments. Chapters within the book cover a wide range of ethical questions and educational contexts, broaching subjects as varied as higher education, artificial intelligence, animal ethics, transcultural encounters, collaborative art, the education of senior citizens and experiences of conflict. Art, ethics and education are not conceived in terms of established orders, representations, ideals, criteria or bodies of knowledge and practice, but rather in terms of dynamic, relational processes and their potentialities, that arise within specific locations, cartographies and ecologies of practice. The notions of art, ethics and education are viewed in terms of assemblages that have the capacity to generate new modes of practice that may question established values and advance new overlappings of aesthetic, ethical and political relations.
