termination of a pregnancy -- The feasibility of a covert Caesarean
section -- Communicating risk : words or numbers? -- Stark
compulsion in grave circumstances -- Going to court too soon -- Best
interests in the absence of suffering -- Patients value candour --
Informed consent & informed dissent : two sides of a coin? -- Parental
consent for their child's deprivation of liberty -- Vulnerable with
capacity -- Compulsory treatment for diabetes -- Approving palliation
-- Acquiescence : not consent -- Making clinical legal decisions.

Sommario/riassunto

"Clinicians must practice medicine in conformity with regulatory
requirements. That is the daily challenge, and those requirements are
founded on medical law. This book describes how clinical law has been
applied in numerous cases, thus providing a clinical appraisal of the
law which is directly applicable to clinical practice in the United
Kingdom"--
