Sommario/riassunto

This special issue, Volume 26 Numbers 1 and 2, brings together differing approaches (from a diverse range of disciplines) to the question of the representation of men's bodies in twentieth-century visual culture - from art photography and cinema to popular culture, advertising and pornography. These are bodies of different colours, nationalities, sexualities, ages, which are available to be gazed upon by many different consumers even though the location of the different images may condition both who looks and how they look.
