#### Sommario/riassunto

The Comstocks of Cornell is the autobiography written by the naturalist educator Anna Botsford Comstock about her life and that of her husband, the entomologist John Henry Comstock-both prominent figures in the scientific community and in Cornell University history. A first edition was published in 1953, but it omitted key Cornellians, historical anecdotes, and personal insights. In this twenty-first-century edition, Karen Penders St. Clair restores the author's voice by reconstructing the entire manuscript as Anna Comstock wrote it-and thereby preserves Comstock's memories of the personal and professional lives of the couple as she originally intended. The book includes an epilogue documenting the Comstocks' last years and fills in gaps from the 1953 edition. Described as serious legacy work, this book is an essential part of the history of both Cornell University and its press.
