

1. Record Nr.	UNINA9910794237603321
Titolo	Mass and count in linguistics, philosophy, and cognitive science / edited by Friederike Moltmann
Pubbl/distr/stampa	Amsterdam ; Philadelphia, : John Benjamins Publishing Company, [2020] ©2020
ISBN	90-272-6043-5
Descrizione fisica	1 online resource (235 pages) : illustrations
Altri autori (Persone)	MoltmannFriederike
Disciplina	415.54
Soggetti	Semantics Grammar, Comparative and general - Numerals Grammar, Comparative and general - Mass nouns
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	"The mass-count distinction is a morpho-syntactic distinction among nouns that is generally taken to have semantic content. This content is generally taken to reflect a conceptual, cognitive, or ontological distinction and relates to philosophical and cognitive notions of unity, identity, and counting. The mass-count distinction is certainly one of the most interesting and puzzling topics in syntax and semantics that bears on ontology and cognitive science. In many ways, the topic remains under-researched, though, across languages and with respect to particular phenomena within a given language, with respect to its connection to cognition, and with respect to the way it may be understood ontologically. This volume aims to contribute to some of the gaps in the research on the topic, in particular the relation between the syntactic mass-count distinction and semantic and cognitive distinctions, diagnostics for mass and count, the distribution and role of numeral classifiers, abstract mass nouns, and object mass nouns (furniture, police force, clothing).The mass-count distinction is a morpho-syntactic distinction among nouns that is generally taken to have semantic content.
