From Dualism towards Integration; References
Sommario/riassunto	The Emotional Brain Revisited tackles various issues at play in the current neuroscientific, psychological, and philosophical research on emotions. The book discusses such topics as the role of amygdala in the emergence of emotions, the place of the affect within the psychological construction of the agent, insights from the research on emotions in animals, and the relation between emotions, rationality, morality, and law. Furthermore, various conceptual controversies

underlying the empirical studies on emotions are considered.

The wide spectrum of links and interrelations found amongst the diversity of human sexual expressions and spiritual practices around the world constitutes one of the most fruitful grounds of scholarly research today. Exploring Sexuality and Spirituality introduces an emerging academic field of studies focused on the multiplicity of problematizations intersecting spirituality and sexuality, from eroticism and ecstasy embodiments to inner spiritual cultivation, intimate relationships, sex education, and gender empowerment. This collection of essays addresses subjects such as prehistoric art, Queer Theology, BDSM, Tantra, the Song of Songs, 'la petite mort', asceticism, feminist performative protests, and sexually charged landscapes, among others. Through varied methodologies and state-of-the-art interdisciplinary approaches, this volume becomes highly useful for readers engaged in the integration of scholarly and practical knowledge.
