

1. Record Nr.	UNINA9910794416103321
Autore	Hoit Jeannette D (Jeannette Dee), <1954->
Titolo	Foundations of speech and hearing : anatomy and physiology // Jeanette D. Hoit, Gary Weismer, Brad Story
Pubbl/distr/stampa	San Diego, California : , : Plural Publishing, , [2022] Â©2022
ISBN	1-63550-307-8
Edizione	[Second edition.]
Descrizione fisica	1 online resource (369 pages)
Disciplina	612.78
Soggetti	Speech - Physiological aspects Speech perception Speech disorders
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"This comprehensive textbook for undergraduate-level anatomy and physiology courses in communication sciences and disorders programs is neither oversimplified nor excessively detailed. The book is written with clinical endpoints in mind, and only those topics that are ultimately important to understanding, evaluating, and managing clients with speech, hearing, and swallowing disorders are covered. Drawing on material from the best-selling Preclinical Speech Science: Anatomy, Physiology, Acoustics, and Perception, Third Edition textbook (Hixon, Weismer, & Hoit, 2020), the authors have provided chapters that cover basic concepts in anatomy and physiology, each of the speech subsystems (respiratory, laryngeal, velopharyngeal-nasal, and pharyngeal oral), the auditory system, swallowing physiology, and neural structures and mechanisms that support speech/language, hearing, and swallowing. The text was carefully crafted to meet the needs of entry-level university students and the figures were designed to feature the key elements of the concepts discussed in the text"--
