

1. Record Nr.	UNINA9910794452803321
Autore	Nasir Khan Muhammad
Titolo	Electronic signals and systems : analysis, design and applications // Muhammad Nasir Khan, Syed K. Hasnain, and Mohsin Jamil
Pubbl/distr/stampa	Gistrup, Denmark : , : River Publishers, , [2020] ©2020
ISBN	1-000-79193-9 1-00-333805-4 1-003-33805-4 1-000-79509-8 1-5231-3885-8 87-7022-169-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (572 pages)
Collana	River Publishers Series in Signal, Image and Speech Processing
Disciplina	621.3822
Soggetti	Signal processing - Digital techniques MATLAB Real-time data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Contents --Preface --Preface to the International Edition --List of Figures --List of Tables --List of Abbreviations --1 Signals --1.1 Introduction --1.2 CT Signals --1.3 Manipulation of CT Signals --1.4 DT Signals --1.5 AD and DA Conversion --1.6 The Sampling Theorem --1.7 Quantization Error --1.8 Representing DT Signal --1.9 Elementary DT Signals --1.10 Simple Manipulations of DT Signal --1.11 Energy and Power Signals for CT and DT Signals --1.12 Problems and Solutions --2 Differential Equations --2.1 Introduction --2.2 Determination of the Transient Response 2.3 Determination of the Steady-State Responses --2.4 Problems and Solutions --3 Laplace Transform --3.1 Introduction --3.2 Theorems of Laplace Transform --3.3 Differential Equations and Transfer Functions --3.4 Problems and Solutions --4 System Description --4.1 System --4.2 Properties of Continuous-time System --4.3 Discrete-Time Systems --4.4 Symbol Used to Represent DTS --4.5 Properties of DTS --4.6 Systems'

Mathematical Model --4.7 Problems and Solutions --5 Control System Response --5.1 Convolution --5.2 Convolution Integral Formula --5.3 Time Response of First-Order Systems --5.4 Time Response of Second-Order Systems --5.5 Time Response Specifications in Design --5.6 Frequency Response of Systems --5.7 Problems and Solutions --6 Control System's Stability --6.1 Introduction --6.2 Routh-Hurwitz Stability Criterion --6.3 Problems and Solutions --7 Fourier Series --7.1 Periodic Function and Fourier Synthesis --7.2 Constructing Waveform with Sine Waves --7.3 Constructing Waveform with Cosine Waves --7.4 Constructing Waveform with Cosine and Sine Waves --7.5 Constructing Waveform with Both Sine and Cosine Waves and DC Component --7.6 Trigonometric Form of the Fourier Series --7.7 Discrete Time Fourier Series of Periodic Signals --7.8 Gibbs' Phenomenon --7.9 Problems and Solutions -- 8 Fourier Transform --8.1 Introduction --8.2 Some Properties of the FT --8.3 Problems and Solutions --9 Solution of Difference Equations --9.1 Constant-Coefficient Difference Equation --9.2 Solution of Difference Equation --9.3 Problems and Solutions --10 Z-Transform --10.1 Introduction --10.2 Z-Transform --10.3 Theorems and Properties of Z-Transform --10.4 Inverse Z-Transform (Residue Method) --11 Analog Filters Design --11.1 Introduction --11.2 LP Filters --11.3 High-Pass Filters --11.4 Band Pass Filters --11.5 Band Reject Filters --11.6 Designing Higher-Order Filters --11.7 Problems Associated with Passive Filters --11.8 Filters Using Operational Amplifiers --11.9 Representing Structure of Analogue Computers --11.10 Step-By-Step Design of Analogue Filters --11.11 Butterworth Approximation Function --11.12 Chebyshev Approximation --11.13 Butterworth and Chebyshev Filters' Comparison --11.14 Practice Problems12 Future Trends --12.1 Skin Lesion Segmentation from Dermoscopic Images using Convolutional Neural Network --12.2 Photodetector based Indoor Positioning Systems Variants: New Look --References --Index --About the Authors

Sommario/riassunto

The Book is intended for a course on signals and systems at the senior undergraduate level. The authors consider all the requirements and tools used in analysis and design of discrete time systems for filter design and signal processing.
