

1. Record Nr.	UNINA9910794481903321
Titolo	Handbook of forensic statistics // edited by David L. Banks, Karen Kafadar, David H. Kaye, Maria Tackett
Pubbl/distr/stampa	Boca Raton : , : Chapman & Hall/CRC, , 2021
ISBN	1-000-09606-8 0-367-52770-7 1-000-09620-3
Descrizione fisica	1 online resource (571 pages)
Collana	Chapman & Hall/CRC handbooks of modern statistical methods
Disciplina	363.25015195
Soggetti	Forensic sciences - Statistical methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Handbook of Forensic Statistics is a collection of chapters by leading authorities in forensic statistics. Written for statisticians, scientists, and legal professionals having a broad range of statistical expertise, it summarizes and compares basic methods of statistical inference (frequentist, likelihoodist, and Bayesian) for trace and other evidence that links individuals to crimes, the modern history and key controversies in the field, and the psychological and legal aspects of such scientific evidence. Specific topics include uncertainty in measurements and conclusions; statistically valid statements of weight of evidence or source conclusions; admissibility and presentation of statistical findings; and the state of the art of methods (including problems and pitfalls) for collecting, analyzing, and interpreting data in such areas as forensic biology, chemistry, and pattern and impression evidence. The particular types of evidence that are discussed include DNA, latent fingerprints, firearms and toolmarks, glass, handwriting, shoeprints, and voice exemplars.
