Record Nr.	UNINA9910794490403321
Titolo	Grammar and cognition : dualistic models of language structure and language processing / edited by Alexander Haselow, Gunther Kaltenböck
Pubbl/distr/stampa	Amsterdam ; Philadelphia, : John Benjamins Publishing Company, [2020] ©2020
Descrizione fisica	1 online resource (vi, 358 pages) : illustrations
Collana	Human cognitive processing ; volume 70
Altri autori (Persone)	HaselowAlexander KaltenböckGunther
Disciplina	401.9
Soggetti	Psycholinguistics Cognitive grammar
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The brain and the mind behind grammar : dualistic approaches in grammar research and (neuro)cognitive studies of language / Alexander Haselow and Gunther Kaltenbock Familiar phrases in language competence : linguistic, psychological, and neurological observations support a dual process model of language / Diana Van Lancker Sidtis Dual process frameworks on reasoning and linguistic discourse : a comparison / Bernd Heine, Tania Kuteva and Haiping Long Language activity in the light of cerebral hemisphere differences : towards a pragma-syntactic account of human grammar / Alexander Guryev and Francois Delafontaine Dual processing in a functional-cognitive theory of grammar and its neurocognitive basis / Kasper Boye and Peter Harder Dichotomous or continuous? : final particles and a dualistic conception of grammar / Katsunobu Izutsu and Mitsuko Narita Izutsu The semantics, syntax and prosody of adverbs in English : an FDG perspective / Evelien Keizer Formulaic language and discourse grammar : evidence from speech disorder / Gunther Kaltenbock Local and global structures in discourse and interaction : linguistic and psycholinguistic aspects / Alexander Haselow Agreement groups and dualistic syntactic processing / Laszlo Drienko.

1.

"This volume brings together linguistic, psychological and neurological research in a discussion of the Cognitive Dualism Hypothesis, whose central idea is that human cognitive activity in general and linguistic cognition in particular cannot reasonably be reduced to a single, monolithic system of mental processing, but that they have a dualistic organization. Drawing on a wide range of methodological approaches and theoretical frameworks that account for how language users mentally represent, process and produce linguistic discourse, the studies in this volume provide a critical examination of dualistic approaches to language and cognition and their impact on a number of fields. The topics range from formulaic language, the study of reasoning and linguistic discourse, and the lexicon-grammar distinction to studies of specific linguistic expressions and structures such as pragmatic markers and particles, comment adverbs, extraclausal elements in spoken discourse and the processing of syntactic groups"--
