

1. Record Nr.	UNINA9910794528503321
Autore	Levine Ethan Czuy
Titolo	Rape by the numbers : producing and contesting scientific knowledge about sexual violence // Ethan Czuy Levine
Pubbl/distr/stampa	Canada : , : Rutgers University Press, , [2021] ©2021
ISBN	1-9788-2367-3
Descrizione fisica	1 online resource (245 pages)
Collana	Critical Issues in Crime and Society
Disciplina	364.15320973
Soggetti	Sex crimes - Canada Sex crimes - United States Rape - Canada Rape - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Series Page -- Title Page -- Copyright -- Dedication -- Contents -- 1. Introduction -- Part I. Conceptualizing Rape -- 2. Locating the Problem -- 3. Accounting for Rape -- 4. Investigating the Aftermath -- Part II. Social Mechanisms -- 5. Choosing to Study Rape -- 6. Dividends and Detriments of Dissent -- 7. Conclusion -- Appendix: Interview Guide -- Acknowledgments -- Notes -- References -- Index -- About the Author -- Series Titles.
Sommario/riassunto	Science plays a substantial, though under-acknowledged, role in shaping popular understandings of rape. Statistical figures like “1 in 4 women have experienced completed or attempted rape” are central for raising awareness. Yet such scientific facts often become points of controversy, particularly as conservative scholars and public figures attempt to discredit feminist activists. Rape by the Numbers explores scientists’ approaches to studying rape over more than forty years in the United States and Canada. In addition to investigating how scientists come to know the scope, causes, and consequences of rape, this book delves into the politics of rape research. Scholars who study rape often face a range of social pressures and resource constraints, including some that are unique to feminized and politicized fields of

inquiry. Collectively, these matters have far-reaching consequences. Scientific projects may determine who counts as a potential victim/survivor or aggressor in a range of contexts, shaping research agendas as well as state policy, anti-violence programming and services, and public perceptions. Social processes within the study of rape determine which knowledges count as credible science, and thus who may count as an expert in academic and public contexts.
