Young -- Contributors -- Index.
Sommario/riassunto	Robert (Bob) Andrew Young (1950-2017) was Canada Research Chair in

Multilevel Governance at the University of Western Ontario and one of Canada's most distinguished political scientists. In *Across Boundaries* Young's former colleagues and students bring together contributions from his extensive network. These essays speak to Young's legacy while providing new insight into research in multilevel governance, secession, and political economy.
