

1. Record Nr.	UNINA9910794558103321
Autore	Greteman Blaine
Titolo	Networking print in Shakespeare's England : influence, agency, and revolutionary change // Blaine Greteman
Pubbl/distr/stampa	Stanford, California : , : Stanford University Press, , [2021] ©2021
ISBN	1-5036-2799-3
Descrizione fisica	1 online resource (257 pages)
Collana	Stanford Text Technologies
Disciplina	094.20942
Soggetti	Social networks - History - England - 17th century Book industries and trade - History - England - 17th century Early printed books - Social aspects - England - 17th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Contents -- List of Illustrations -- Acknowledgments -- Abbreviations -- Note on Quotations -- INTRODUCTION -- 1 Methods and Data -- 2 A Small New World: Fire, Infection, and Sudden Change in the English Print Network -- 3 Hubs in the Network: Nicholas Okes and the Making of Infectious Information -- 4 Radical Betweenness: Eleanor Davies and Mary Cary -- 5 Weak Ties and the Making of a Strong Poet: John Milton's Early Publishers -- EPILOGUE: Future Directions in Networking the Past -- Notes -- Index.
Sommario/riassunto	In <i>Networking Print in Shakespeare's England</i> , Blaine Greteman uses new analytical tools to examine early English print networks and the systemic changes that reshaped early modern literature, thought, and politics. In early modern England, printed books were a technology that connected people—not only readers and writers, but an increasingly expansive community of printers, publishers, and booksellers—in new ways. By pairing the methods of network analysis with newly available digital archives, Greteman aims to change the way we usually talk about authorship, publication, and print. As Greteman reveals, network analysis of the nearly 500,000 books printed in England before 1800 makes it possible to speak once again of a "print revolution," identifying a sudden tipping point at which the early modern print

network became a small world where information could spread in new and powerful ways. Along with providing new insights into canonical literary figures like Milton and Shakespeare, data analysis also uncovers the hidden histories of key figures in this transformation who have been virtually ignored. Both a primer on the power of network analysis and a critical intervention in early modern studies, the book is ultimately an extended meditation on agency and the complexity of action in context.
