

1. Record Nr.	UNINA9910794642803321
Autore	Miller Paul M (Archaeologist)
Titolo	Continuity and change in Etruscan domestic architecture // Paul M. Miller
Pubbl/distr/stampa	Oxford, England : , : Archaeopress Publishing Limited, , [2017] ©2017
ISBN	1-78491-581-5
Descrizione fisica	1 online resource (XV, 272 p. : ill.)
Disciplina	722.6209375
Soggetti	Dwellings - Italy - Etruria Architecture, Domestic
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Copyright Information -- Contents -- Abstract -- Acknowledgments -- Chapter 1: Introduction -- 1.1 Book outline -- Chapter 2: Theory, methods and a review of the literature -- 2.1 Theory -- 2.1.1 Amos Rapoport and Environment-Behaviour Relations -- 2.1.2 Behaviour -- 2.1.3 Traditional, habitually innovative and actively innovative behaviours -- the process of changing behaviour -- 2.1.4 Conclusions -- 2.2 Methods -- 2.2.1 Identifying Techniques -- 2.2.2 Working from concept to abandonment -- chaîne opératoire and architecture -- 2.2.3 Conclusions -- 2.3 Domestic architectural change in context -- 2.3.1 Socio-cultural changes in the broader historical context -- 2.3.1.1 Changing society in Early Iron Age Etruria -- 2.3.1.2 Changing society in Orientalising and early Archaic period Etruria -- 2.3.2 Socio-cultural changes in relation to architecture -- 2.4 A review of the literature on four key sites -- 2.4.1 San Giovenale -- 2.4.2 Acquarossa -- 2.4.3 Lago dell'Accesa -- 2.4.4 Poggio Civitate (Murlo) -- 2.4.5 Conclusions -- 2.5 Conclusion -- Chapter 3: The foundations of early Etruscan buildings, 800-625 BC -- 3.1 Foundation Type 1 -- 3.1.1 Ground preparation -- 3.1.2 Wall footings -- 3.1.3 Flooring -- 3.1.4 Roof supports -- 3.1.5 Rectangular Foundation Type 1 buildings -- 3.2 Foundation Type 2 -- 3.2.1 Ground preparation -- 3.2.2 Wall footings -- 3.2.2.1 Robust and refined socles: a sign of technological sophistication? -- 3.2.3 Flooring -- 3.2.4 Roof supports -- 3.3

Foundation Type 3 -- 3.3.1 Wall footings -- 3.3.1.1 The interaction between bedrock and rubble in the Large Iron Age Building -- 3.3.1.2 The shelf wall footings of San Giovenale Area F East's House I -- 3.3.2 Flooring -- 3.3.3 Roof supports -- 3.3.4 Élite residence or communal building? A discussion of function and social stratification -- 3.4 Conclusions.

Chapter 4: The foundations of Orientalising and early Archaic period Etruscan buildings, 625-500 BC -- 4.1 Foundation Type 4 -- 4.1.1 Ground preparation -- 4.1.2 Wall footings -- 4.1.3 Flooring -- 4.1.4 Roof supports -- 4.1.5 The importance of the courtyard and the appearance of the building unit -- 4.2 Foundation Type 5 -- 4.2.1 Ground preparation -- 4.2.2 Wall footings -- 4.2.3 Flooring -- 4.2.4 Roof supports -- 4.2.5 Variability in Type 5 foundations -- 4.3 Conclusions -- 4.3.1 The traditional and innovative techniques of Foundation Type 4 -- 4.3.2 The traditional and innovative techniques of Foundation Type 5 -- 4.3.3 Is there a discernable difference in the foundations between a 'hut' and a 'house'? -- Chapter 5: The walls and roofs of Etruscan domestic structures, 800-500 BC -- 5.1 Walls -- 5.1.1 Defining non-stone walling techniques -- 5.1.1.1 Wattle -- 5.1.1.2 Wattle vs. graticcio -- 5.1.1.3 Pisé -- 5.1.1.4 Wall footings and the identification of non-stone walling -- 5.1.1.5 Mud brick -- 5.1.2 Defining stone walling techniques and the debate over the timber-to-stone transition in Etruscan architecture -- 5.1.3 Evidence of wall types -- 5.1.3.1 Direct evidence of wall techniques -- 5.1.3.2 Circumstantial evidence of walling techniques -- 5.1.3.3 Stone walling techniques and circumstantial evidence -- 5.1.4 Conclusions on walls -- 5.2 Roofs -- 5.2.1 Ö. Wikander's typology and C. Wikander's model: The established concepts of seventh- and sixth-century tile roofing -- 5.2.2 The transition between hipped and saddle roofing types -- 5.2.3 Conclusions on roofs -- 5.3 Conclusions -- Chapter 6: Material Procurement, Production and Use -- 6.1 The difference between building materials and building techniques -- 6.2 Was there a transition in raw material procurement, composition or use from 800-500 BC? -- 6.2.1 Stone -- 6.2.2 Timber.

6.2.2.1 The environmental impact of timber procurement and its effect on Etruscan domestic architecture -- 6.2.3 Clay and cane -- 6.2.4 Conclusions -- 6.3 How did the production and use of manufactured building materials change from 800-500 BC? -- 6.3.1 800-700 BC -- 6.3.2 699-600 BC -- 6.3.2.1 Clay-revetted thatch and the early manufacture of terracotta tiles -- 6.3.2.2 Why does ashlar tufa stone production and use stand out? -- 6.3.3 599-500 BC -- 6.4 Were changes in architecture a result of new materials? -- 6.5 Conclusions -- Chapter 7: Conclusions -- 7.1 Reasons for change -- building techniques in Etruscan domestic architecture from 800-500 BC -- 7.1.1 What instigated the innovations in foundation techniques? -- 7.1.2 Is there evidence for innovation in walling techniques? -- 7.1.3 What triggered the transitions in the construction of Etruscan roofs? -- 7.1.4 Summary of primary results -- 7.2 The broader implications and limitations of this book -- 7.2.1 The place of this book within the scholarly literature -- The broader implications of research on building techniques -- 7.2.2 Limitations of this study -- 7.2.2.1 Limits of the evidence -- 7.2.2.2 Other weaknesses in the evidence -- Glossary -- Bibliography -- Figure 2.1. The "model of evaluative process", used in EBR studies (Rapoport 2000: 146). -- Figure 2.2. This sequence of morphogenesis in cognitive structures (e.g. habitus) outlines how the individual or the group alter the established habitus. 'Relation (a)' is the social conditioning on the agent and 'Relation (b)' is the unconscious or consc -- Figure 2.3. Tomba della Campana at Veii based on Canina's

(1847: pl. 31) inscription (Leighton 2005: 376). -- Figure 2.4. Map of Etruria (after Catalli 2001: 89).

Sommario/riassunto

Etruscan architecture underwent various changes between the later Iron Age and the Archaic period. This book reconsiders these changes by focusing on the building materials and techniques used in the construction of domestic structures.
