   Sommario/riassunto From a general perspective, as well as in scientific practice, technology and society are viewed as two distinct entities. Related to this view are the assumption that technology and human experience are quite different and unconnected and the idea that modernity has uprooted, de-contextualised, and disembodied technical rationality. Adopting a contrary approach, this book represents a theoretical exploration to show that, in the domain of technological development, there are significant margins for manoeuvre in which to recuperate and valorise human and social action, in order to envisage a b
