Pubbl/distr/stampa	Bingley : , : Emerald Publishing, , 2017
ISBN	1-78743-464-8 1-78743-411-7
Edizione	[First edition.]
Descrizione fisica	1 online resource (267 pages) : illustrations
Disciplina	658.834
Soggetti	Consumption (Economics) Climate change mitigation Business & Economics - Marketing - General Sales & marketing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Drawing from decades of research, Genes, Climate, and Consumption Culture: Connecting the Dots demonstrates how climate dictates culture and consumption. The author shows that human genes are climatic adaptations over thousands of years of evolution, which has resulted in the dramatic differences between people's food, clothing, and shelter choices. Most importantly, the book discusses how many of the fundamental differences between cultures, with respect to time, space, friendship, and technology, are responses to their particular climate. Readers will learn how to challenge their assumptions about what types of products and services foreign markets want. They will learn how to examine local markets vis-a-vis climate and culture, either changing their products accordingly or delivering entirely new offerings.
