When Social Movements Become a Democratizing Force: The Political
Impact of the Student Movement in Chile

Sommario/riassunto

In light of the limited achievements of the Arab Spring and other pro-democracy movements, volume 39 examines and unpacks arguments that these protests represent both a new phase and new prospects for democratic mobilization. The volume engages with new theoretical and methodological perspectives and illuminates novel aspects of transnational social movement dynamics, such as the evolving role of information technology, deterritorialisation and government counter-responses.
