Time-limited work with a male survivor experiencing post-traumatic stress disorder (Neil)
Sommario/riassunto	"In a culture where to be male is often to be expected to embody strength, power and being in control, male victims of sexual abuse can be particularly challenging to help. This book outlines seven composite detailed case studies representing men from a wide range of backgrounds and demographics. It lays out how the author's ... model of an integrative approach, [that] includes psychodynamic, humanistic, relational, cognitive behavioural, body-based and arts-based approaches, can offer an effective model for working with this client group."--Back cover.
