| Sommario/riassunto | In Digitalized Finance , Edemilson Paraná investigates the relationship between the development of Information and Communication Technologies (ICT) and the process of financialization of economies on a global scale, particularly in Brazil. The book explains the influence of ICT in the emergence and consolidation, especially from the 1980s, of new forms of operation and management of the globalized financial system, highly connected, operated in “real time” with intensive use of technological features, and how these advances are related with the economic and social changes in question. It also describes how contemporary capital markets work, where the search for earnings is leveraged by sophisticated mathematical models, robots and automated trading software that seek financial gains in the milliseconds scale. |

| Sommario/riassunto | By any measure, the law as a profession is in serious trouble. Americans' trust in lawyers is at a low, and many members of the profession wish they had chosen a different path. Law schools, with their endlessly rising tuitions, are churning out too many graduates for the jobs available. Yet despite the glut of lawyers, the United States ranks 67th (tied with Uganda) of 97 countries in access to justice and affordability of legal services. The upper echelons of the legal establishment remain heavily white and male. Most problematic of all, the professional organizations that could help remedy |
