Sommario/riassunto

"With the passage of the Post-9/11 GI Bill in 2008, more than 1.4 million service members and their families became eligible for higher education benefits, and veterans from the wars in Iraq and Afghanistan enrolled in colleges and universities in record numbers. The first wave of research about these new student veterans focused mostly on describing their characteristics and the transition from military service to civilian life and the college campus. This new edited collection presents findings from the second wave of research about student veterans, with a focus on data-driven evidence of academic success factors, including persistence, retention, degree completion, and employment after college."--Provided by publisher.
