

1. Record Nr.	UNINA9910795277703321
Autore	Martin-Nagle Renee
Titolo	Governance of offshore freshwater resources // by Renee Martin-Nagle
Pubbl/distr/stampa	Leiden, The Netherlands ; ; Boston : , : Brill Nijhoff, , [2020] ©2020
ISBN	9004421041 9789004421042 (Proquest Ebook Central) 9789004421035
Descrizione fisica	1 online resource
Collana	Legal aspects of sustainable development, , 1875-0923 ; ; vol.25
Disciplina	341.448
Soggetti	Marine resources development - Law and legislation Continental shelf - Law and legislation Groundwater - Law and legislation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Based on author's thesis (doctoral - University of Strathclyde, 2019).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Legal Principles Governing Seabed Natural Resources -- Legal Principles Governing Land-based Freshwater Resources -- Legal Principles Governing Offshore Hydrocarbon Development -- Governance of Offshore Freshwater and Emerging Trends.
Sommario/riassunto	"In Governance of Offshore Freshwater Resources Renee Martin-Nagle presents the scientific proof for vast quantities of freshwater in the seabeds, explains the socio-economic factors that will lead to development of the resource, and examines the international law principles and regimes that would guide policymakers in designing a governance system for offshore freshwater. Pursuant to the law of the sea, coastal states have sovereign rights to seabed resources within their exclusive economic zones. Offshore hydrocarbon development has produced customary practices for cooperation that were inspired by international water law and that could serve as a template for governing transboundary offshore freshwater. Given the vital nature of freshwater, equitable distribution of this new resource and its benefits should be considered".
