Autore	McGuire Chad J.
Titolo	Adapting to Sea Level Rise in the Coastal Zone : Law and Policy Considerations / / by Chad J. McGuire
Pubbl/distr/stampa	Boca Raton, FL : , : Routledge, , [2017] ©2013
ISBN	1-351-57751-4 1-315-09757-5 1-4665-5982-9
Edizione	[1st edition]
Descrizione fisica	1 online resource (225 p.)
Disciplina	363.34
Soggetti	Sea level - Environmental aspects Coast changes Coastal zone management - Government policy Environmental policy Environmental law Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Contents; About the Author; Chapter 1 - Introduction; Chapter 2 - Science behind Sea Level Rise; Chapter 3 - Policy Options; Chapter 4 - Legal Considerations; Back Cover
Sommario/riassunto	For as long as humans have been inhabiting coastal areas and recording what occurs in their environments, coastal zones have been defined through dynamic interactions. And this is further underlined by a more recent development: observed sea level rise. In a thorough but not overly technical approach, <i>Adapting to Sea Level Rise in the Coastal Zone: Law and Policy Considerations</i> provides a legal-policy framework for facing the challenges of sea level rise. The book includes an analysis of sea level rise adaptation strategies that examines the legal impacts of coastal land use decisions based on the current interpretation of private property rights in relation to public control over those rights. The author discusses the science behind sea level

rise and highlights policy complexities and options. He then presents an overview of related legalities, and bringing it all together, applies the principles offered in the book, concluding with strategies and solutions and a perspective on the future. If we accept the premise that sea level rise is occurring and will continue for the foreseeable future, then we must begin to consider policy responses to this risk in coastal regions. Part of any pragmatic policy response must include a review of the options available to public institutions when developing and implementing rational adaptation policies. This book offers practical legal/policy approaches to sea level rise adaptation that promotes sound planning in the face of climate change and rising seas.

"As a middle path between classical theism and pantheism, the panentheistic turn in the twentieth century has been described as a "quiet revolution." Today, in fact, many theologians hold that the world is "in" God (who, at the same time, is more than the world). Panentheism has been especially influential in the dialogue between theology and the natural sciences. Many have seen panentheism as compatible with emergentism, and thus have brought the two together in developing models of divine action that do not abrogate the regularities of processes of the natural world. In *Divine Action and Emergence*, Mariusz Tabaczeck argues that, as inspiring and intriguing as emergentist panentheism is, it requires deeper examination. He begins by looking at the wonder of emergence (which calls into question the overly reductionist attitude in natural science) and by reflecting philosophically on emergence theory in light of classical and new Aristotelianism. Moving in a theological direction, Tabaczeck then offers a critical evaluation of emergentist panentheism and a constructive proposal for how to reinterpret the idea of divine action as inspired by the theory of emergence with reference to the classical Aristotelian-Thomistic understanding of God's action in the universe. Through a unique interdisciplinary approach that puts theology and the natural sciences into a dialogue through philosophy, *Divine Action and Emergence* offers a comprehensive evaluation of panentheism. It then puts forward an original reinterpretation of emergence theory, thus setting forth a constructive proposal for reinterpreting the concept of divine action that is currently espoused by emergence theory. It will appeal to scholars of theology and philosophy, those who work in the area of theology and science, those interested in emergence theory or panentheism, and finally those who are interested in the dialogue between the classical Aristotelian-Thomistic tradition and contemporary philosophy and theology"--
