

1. Record Nr.	UNINA9910795419403321
Titolo	Minimum design loads and associated criteria for buildings and other structures // American Society of Civil Engineers
Pubbl/distr/stampa	Reston, Virginia : , : American Society of Civil Engineers, , [2021] ©2021
ISBN	9780784483497 9780784415788
Edizione	[1st ed.]
Descrizione fisica	1 online resource (lx, 975, 9 pages) : illustrations (some color), maps
Collana	Standards ; ; v.ASCE/SEI 7-22
Disciplina	690.0218
Soggetti	Buildings - Standards Standards, Engineering - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1 General; Chapter 2 Combinations of Loads; Chapter 3 Dead Loads, Soil Loads, and Hydrostatic Pressure; Chapter 4 Live Loads; Chapter 5 Flood Loads; Chapter 6 Tsunami Loads and Effects; Chapter 7 Snow Loads; Chapter 8 Rain Loads; Chapter 9 Reserved for Future Provisions; Chapter 10 Ice Loads—Atmospheric Icing; Chapter 11 Seismic Design Criteria; Chapter 12 Seismic Design Requirements for Building Structures; Chapter 13 Seismic Design Requirements for Nonstructural Components; Chapter 14 Material-Specific Seismic Design and Detailing Requirements; Chapter 15 Seismic Design Requirements for Nonbuilding Structures; Chapter 16 Nonlinear Response History Analysis; Chapter 17 Seismic Design Requirements for Seismically Isolated Structures; Chapter 18 Seismic Design Requirements for Structures with Damping Systems; Chapter 19 Soil–Structure Interaction for Seismic Design; Chapter 20 Site Classification Procedure for Seismic Design; Chapter 21 Site-Specific Ground Motion Procedures for Seismic Design; Chapter 22 Seismic Ground Motion and Long-Period Transition Maps; Chapter 23 Seismic Design Reference Documents; Chapter 24 Reserved for Future Provisions; Chapter 25 Reserved for Future Provisions; Chapter 26 Wind Loads: General Requirements; Chapter 27 Wind Loads on Buildings: Main Wind Force Resisting System (Directional Procedure); Chapter 28 Wind Loads on

Buildings: Main Wind Force Resisting System (Envelope Procedure); Chapter 29 Wind Loads on Building Appurtenances and Other Structures: Main Wind Force Resisting System (Directional Procedure); Chapter 30 Wind Loads: Components and Cladding; Chapter 31 Wind Tunnel Procedure; Chapter 32 Tornado Loads; Appendix A Reserved for Future Provisions; Appendix B Reserved for Future Provisions; Appendix C Serviceability Considerations; Appendix D Buildings Exempted from Torsional Wind Load Cases; Appendix E Performance-Based Design Procedures for Fire Effects on Structures; Appendix F Wind Hazard Maps for Long Return Periods; Appendix G Tornado Hazard Maps for Long Return Periods; Commentary to Standard ASCE/SEI 7-22

---

## Sommario/riassunto

Prepared by the Minimum Design Loads and Associated Criteria for Buildings and Other Structures Standards Committee of the Codes and Standards Activity Division of the Structural Engineering Institute of ASCE Minimum Design Loads and Associated Criteria for Buildings and Other Structures, ASCE/SEI 7-22, provides the most up-to-date and coordinated loading provisions for general structural design. This standard prescribes design loads for all hazards including dead, live, soil, flood, tsunami, snow, rain, atmospheric ice, seismic, wind, and fire, as well as how to evaluate load combinations. The 2022 edition of ASCE 7, which supersedes ASCE 7-16, coordinates with the most current structural material standards including those from ACI, AISC, AISI, AWC, and TMS. Significant technical changes include the following: new target reliability tables for tsunami and extraordinary loads; new alternative method for loads from water in soil; terminology change from guardrail system to guard system; new provisions for emergency vehicle loads; updated tsunami data for Hawaii and many populous locations in California, coordinated with the state agencies; new tsunami provisions for above-ground horizontal pipelines; revised ground snow loads to reflect more recent snow load data and reliability-targeted values; revised method for estimating drifts to include a wind parameter; design rain load revisions to explicitly consider a ponding head; new risk-targeted atmospheric ice load data for the continental United States and Alaska; multi-period response spectrum data that eliminates need for  $F_a$  and  $F_v$  coefficients; new lateral force resisting systems such as steel and concrete coupled composite plate shear walls, reinforced concrete ductile coupled shear walls, cross-laminated timber shear walls, and concrete tabletop structures; new provisions for rigid wall, flexible diaphragm buildings (big box stores/warehouses); new and updated provisions for supported and interconnected (coupled) nonbuilding structures; new wind provisions for MWFRS and C&C of elevated buildings; new chapter of tornado provisions; new long return period hazard maps for wind and tornado; and digital data available for all hazards at ASCE Hazard Tool (<https://asce7hazardtool.online/>). In addition to the technical changes, the 2022 edition of ASCE 7 provisions are accompanied by detailed commentary with explanatory and supplementary information developed to assist users of the standard, including design practitioners, building code committees, and regulatory authorities. Standard ASCE/SEI 7 is an integral part of building codes in the United States and around the globe, and is adopted by reference into the International Building Code, International Existing Building Code, International Residential Code, and NFPA 5000 Building Construction and Safety Code. Structural engineers, architects, and those engaged in preparing and administering local building codes will find the structural load requirements essential to their practice.

2. Record Nr.	UNINA9910812170903321
Autore	Butler Ian <1955->
Titolo	Scandal, social policy, and social welfare // Ian Butler and Mark Drakeford [[electronic resource]]
Pubbl/distr/stampa	Bristol : , : Policy Press, , 2005
ISBN	1-4473-0331-8 1-281-15985-9 9786611159856 1-84742-132-6
Edizione	[Revised second edition.]
Descrizione fisica	1 online resource (viii, 311 pages) : digital, PDF file(s)
Collana	BASW/Policy Press titles
Altri autori (Persone)	Butlerlan <1955->
Disciplina	361.610941
Soggetti	Public welfare - Great Britain Social problems - Great Britain Scandals - Great Britain Great Britain Social policy 1979-
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 12 Jan 2022).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; SCANDAL, SOCIAL POLICY AND SOCIAL WELFARE; Contents; Preface; Acknowledgements; Notes on the authors; ONE - Scandal; TWO - 'Gothic nightmare' - Madness and public policy from the 18th century; THREE - 'The corruption of care' - The Ely Hospital Inquiry 1969; FOUR - 'Household happiness, gracious children' - Children, welfare and public policy, 1840-1970; FIVE - The story of Cinderella - The Report of the Committee of Inquiry into the Care and Supervision Provided in Relation to Maria Colwell 1974; SIX - 'Mere oblivion' - The fate of the institution and the advent of community care SEVEN - 'Carnage in the community' - The Christopher Clunis Inquiry 1993EIGHT - 'An ambience of uneasiness' - The residential care of children, 1834-1990; NINE - 'A narrow, punitive and harshly restrictive experience' - The Pindown experience and the protection of children: The Report of the Staffordshire Child Care Inquiry 1991; TEN - Scandal, welfare and public policy; ELEVEN - The final chapter?; Bibliography; Index
Sommario/riassunto	By examining the landmark scandals of the post-war period, including

more recent ones such as the Victoria Climbié Inquiry, this book reveals how scandals are generated, to what purposes they are used and whose interests they are made to serve.
