Sommario/riassunto	The 2011 John Bowlby Memorial Conference, 'From Broken Attachments to Earned Security - The Role of Empathy in Therapeutic Change', focused on what needs to take place to facilitate empathy and attunement and ultimately the achievement of earned security. The

conference posed the challenge of how to re-establish a secure sense of self, mutuality, and the capacity for inter/intra-subjectivity when difficulties in empathy and attunement exist as a result of relational trauma. This can be between parent and child, within adult relationships, between client and therapist, or in organisational contexts. The outstanding collection of papers in this volume make a significant contribution to the field of attachment and our understanding of how child rearing affects each aspect of our lives, from the interpersonal to the organisational and societal. Each paper moves beyond the academic and theoretical to provide answers to the many difficult questions raised at the conference.

### Sommario/riassunto

Exchanges between different cultures and institutions of learning have taken place for centuries, but it was only in the twentieth century that such efforts evolved into formal programs that received focused attention from nation-states, empires and international organizations. Global Exchanges provides a wide-ranging overview of this underresearched topic, examining the scope, scale and evolution of organized exchanges around the globe through the twentieth century. In doing so it dramatically reveals the true extent of organized exchange and its essential contribution for knowledge transfer, cultural interchange, and the formation of global networks so often taken for granted today.
