Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- CONTENTS -- List of Illustrations -- Acknowledgments -- Introduction -- Chapter 1 The Contradictions of the Capitalist World System at the Beginning of the Twenty-First Century -- Chapter 2 Twentieth-Century Attempts to Create Socialism: Successes and Failures -- Chapter 3 Technoliberal and Countercultural Visions of the Future -- Chapter 4 Eff orts to Reconceptualize Socialism -- Chapter 5 The Role of Anti-systemic Movements in Creating a Socio-ecological Revolution -- Chapter 6 Transitional System-Challenging Reforms -- Chapter 7 Conclusion: The Future in the Balance -- References -- Index
Sommario/riassunto	As global economic and population growth continues to skyrocket, increasingly strained resources have made one thing clear: the desperate need for an alternative to capitalism. In Democratic Eco-Socialism as a Real Utopia, Hans Baer outlines the urgent need to reevaluate historical definitions of socialism, commit to social equality and justice, and prioritize environmental sustainability. Democatic eco-socialism, as he terms it, is a system capable of mobilizing people around the world, albeit in different ways, to prevent on-going human socio-economic and environmental degradation, and anthropogenic climate change.
