Sommario/riassunto	Cyberthreats evolve at a staggering pace, and effective cybersecurity operations depend on successful teams. Unfortunately, statistics continue to illustrate that employers are not finding the people they need. The Can. Trust. Will. system guides the C-Suite, HR professionals and talent acquisition to build unbeatable cybersecurity teams through advanced hiring processes and focused on-boarding programs. Additionally, this book details how successful cybersecurity ecosystems are best built and sustained, with expert analysis from high-level government officials, Fortune 500 CSOs and CISOs, risk managers, and even a few techies. Those already in the field (and newbies) will glean invaluable knowledge about how to find their most effective position within a cybersecurity ecosystem. In a tech-driven environment, cybersecurity is fundamentally a human problem: and the first step is

to hire for the human element.
