Nota di contenuto	Huawei's domestic accumulation : a path intertwining with China's ICT development -- Going global : outward expansion into the Global South -- March into the Global North : opportunity or peril? -- From path-dependent to pathbreaking? Huawei's technological capability development -- Ownership, management, and labor discipline.
Sommario/riassunto	With the rise of China's information and communications technology (ICT) sector, a number of Chinese high-tech firms are approaching transnational stages and shifting the center of gravity in global ICT markets. In the meantime, China's digital economy has raised the debate with regard to the nature and direction of its developmental model. This text investigates Huawei Technologies - China's most competitive high-tech company - as a microcosm of the rise of China's corporate power and its evolving digital economy.
