Autore	Abuzeid Waleed M
Titolo	The Frontal Sinus : Surgical Approaches and Controversies / / by: Georgalas, Christos, Sama, Anshul
Pubbl/distr/stampa	NEW YORK : , : Thieme Medical Publishers, Incorporated, , 2022 ©2022
ISBN	3-13-243784-0 3-13-242669-5
Edizione	[1. Edition.]
Descrizione fisica	1 online resource (418 pages)
Disciplina	617.523
Soggetti	Otorhinolaryngology, Phoniatics, Audiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>"This book will be a valuable resource for novice surgeons approaching one of the most challenging anatomical subsites, since it provides a stepwise approach to understanding the anatomical background, the radiological aspects, and the broad spectrum of different surgical approaches to the frontal sinuses. The authors are to be congratulated for this masterpiece, which will become the gold standard for experts and beginners." --Paolo Castelnuovo Edited by renowned rhinologists and skull base surgeons Christos Georgalas and Anshul Sama, this complete guide to frontal sinus surgery covers surgical anatomy and radiology, frontal-specific pathology, surgical techniques, technical advancements, and controversies. It focuses on those starting surgical practice and it is also of interest to well-established surgeons. This book brings together some of the leading surgeons across the globe to provide varied and complementary perspectives. The content is organized in five sections: surgical anatomy, specific conditions of the frontal sinus, open surgical approaches, endoscopic surgical approaches, and controversies. Key Features More than 600 full-color images and diagrams illustrating surgical concepts and demonstrating detailed techniques Stepwise descriptions of surgical techniques with a "tips and tricks" section in each chapter drawn from the authors'</p>

experience Clinical case presentations in each chapter illustrating key concepts and techniques A truly global and balanced perspective with world-leading authors from all continents Controversial topics analyzed from evidence-based medicine (EBM) perspective This is a must-have resource for otolaryngology-head and neck surgery residents, fellows, and specialists that may also benefit neurosurgeons, maxillofacial surgeons, plastic surgeons, and other clinicians who deal with this challenging and complex area.

Chapter 1: Introduction -- Chapter 2: Climatic Challenges to Water in the Linear Economy -- Chapter 3: Non-Climatic Challenges to Water in the Linear Economy -- Chapter 4: The Circular Water Economy -- Chapter 5: Developing the Circular Water Economy: Reduce -- Chapter 6: Developing the Circular Water Economy: Reuse and Recycle -- Chapter 7: Developing the Circular Water Economy: Recover -- Chapter 8: Anglian Water Developing the Circular Water Economy -- Chapter 9: Austin Water Developing the Circular Water Economy -- Chapter 10: New York City Department of Environmental Protection Developing the Circular Water Economy -- Chapter 11: South Australia Water Corporation Developing the Circular Water Economy -- Chapter 12: San Francisco Public Utilities Commission Developing the Circular Water Economy -- Chapter 13: Singapore's Public Utilities Board Developing the Circular Water Economy -- Chapter 14: Waternet Developing the Circular Water Economy -- Chapter 15: Best Practices -- Chapter 16: Conclusions.

This book presents new research on policy innovations that promote the development of the circular water economy. In contrast to the linear economy, the circular water economy promotes the reduction of water consumption, reuse of water, and recovery of resources from wastewater to not only increase resilience to climate change but also to reduce greenhouse gas emissions resulting from the provision of water and wastewater-related services. Providing a series of in-depth case studies of important locations in differing climates around the globe that have implemented a variety of policy innovations to develop the circular water economy, this book is a valuable resource for water and resource conservation managers, policymakers, international companies and organisations interested in the circular economy, environmental NGOs, researchers, as well as graduate and undergraduate students. · Systematically reviews policy innovations to develop the circular water economy · Illustrates how leading locations from around the world have developed the circular water economy to increase resilience to climate change while reducing emissions · Provides 'best practices' for other locations around the world aiming to implement the circular water economy Robert C. Brears is the author of Urban Water Security, The Green Economy and the Water-Energy-Food Nexus, Blue and Green Cities, Natural Resource Management and the Circular Economy, and Climate Resilient Water Resources Management. Robert is the founder of Our Future Water, Mark and Focus, and Mitidaption.
