Sommario/riassunto	The Pacific Poetry Project's first volume, Alive at the Center, aims to capture the thriving poetic atmosphere of the Pacific Northwest. It concentrates on the three major cities that define it-Portland, Seattle, and Vancouver B.C. This anthology, compiled and edited by an outstanding poet from each city, is a cultural conversation among the unique urban communities whose perspectives share more than just a common landscape. Alive at the Center features distinctive, contemporary poets who speak to the individual spirits of these Pacific Northwest cities.

Sommario/riassunto

Research and development in the whole area of nanomaterials, including thin films, nanowires, nanocrystals, nano-composites and nanostructured bulk materials, continues to increase year by year. More and more attention is being focused on research which will permit greater control of structures at the nanometer level, in order to ensure that the desired functional properties can be obtained. The aim of the present book was to enable those working at the cutting-edge of research to present and debate the progress currently being made, in the theory and application, of functionalised nanoparticl

Sommario/riassunto

The scope of this volume will encompass a collection of research papers related to indexing and retrieval of online non-text information. In recent years, the Internet has seen an exponential increase in the number of documents placed online that are not in textual format. These documents appear in a variety of contexts, such as user-generated content sharing websites, social networking websites etc. and formats, including photographs, videos, recorded music, data visualizations etc. The prevalence of these contexts and data formats presents a particularly challenging task to information indexing
