                        1-68392-819-9

    Descrizione fisica 1 online resource (246 pages)

    Collana   Computing

    Disciplina   001.42

    Soggetti   Quantitative research - Reliability
                        Quantitative research - Data processing

    Lingua di pubblicazione Inglese

    Formato   Materiale a stampa

    Livello bibliografico Monografia

    Nota di contenuto   Frontmatter -- Contents -- Preface -- Chapter 1: Introduction to
                        Probability and Statistics -- Chapter 2: Working with Data -- Chapter 3:
                        Introduction to Pandas -- Chapter 4: Introduction to RDBMS and SQL --
                        Chapter 5: Working with SQL and MySQL -- Chapter 6: NLP and Data
                        Cleaning -- Chapter 7: Data Visualization -- Index

    Sommario/riassunto As part of the best-selling Pocket Primer series, this book is designed
                        to introduce the reader to the basic concepts of managing data using a
                        variety of computer languages and applications. It is intended to be a
                        fast-paced introduction to some basic features of data management
                        and covers statistical concepts, data-related techniques, features of
                        Pandas, RDBMS, SQL, NLP topics, Matplotlib, and data visualization.
                        Companion files with source code and color figures are available.
                        FEATURES: Covers Pandas, RDBMS, NLP, data cleaning, SQL, and data
                        visualization. Introduces probability and statistical concepts. Features
                        numerous code samples throughout. Includes companion files with
                        source code and figures.
