Sommario/riassunto	Rather than simply a record of proceedings (3rd International Conference on Functional Grammar, Amsterdam, June 1988), this

volume contains revised and expanded papers from the conference and other papers inspired by the lively discussion there. The volume focuses on the nature of the structures assumed to underlie utterances in natural languages, in two respects. One area is the question of whether to expand the representations accepted in Functional Grammar (FG) in order to capture interpersonal functions, i.e., communication between speaker and hearer in a particular situation and context,

### Sommario/riassunto

Abortion Care as Moral Work brings together the voices of abortion providers, abortion counselors, clinic owners, neonatologists, bioethicists, and historians to discuss how and why providing abortion care is moral work. The collection offers voices not usually heard as clinicians talk about their work and their thoughts about life and death. In four subsections--Providers, Clinics, Conscience, and The Fetus--the contributions in this anthology explore the historical context and present-day challenges to the delivery of abortion care. Contributing authors address the motivations that lead abortion providers to offer abortion care, discuss the ways in which anti-abortion regulations have made it increasingly difficult to offer feminist-inspired services, and ponder the status of the fetus and the ethical frameworks supporting abortion care and fetal research. Together these essays provide a feminist moral foundation to reassert that abortion care is moral work.
