Sommario/riassunto

This paper argues that in reserve currency issuing economies at the effective lower bound, outright transfers from the central bank to households are both more equitable and more effective in achieving monetary policy objectives than asset purchases or negative interest rates. It shows that concerns pertaining to central banks' policy solvency and equity position can be addressed through a careful assessment of a central bank's loss absorbing capacity and, if need be, tiered reserve remuneration policies. It also spells out key differences to a debt or money financed fiscal stimulus, which are particularly pronounced in a currency union without a central fiscal capacity. The paper concludes by discussing broader institutional, political, and legal considerations.

3. Record Nr.	UNINA9910792184603321
Autore	Strong Steven

Sommario/riassunto	This book is third in a series dedicated to the first Homo sapiens: the Australian Aboriginal people. Steven and Evan Strong continue their investigation into the global impact of Aboriginal people, relaying that the First Australians are unique, and in no way descended from Africans or any other race.
