#### Sommario/riassunto

This book presents the results of a series of studies of the labor markets in Pune, a medium-sized city in India. In the seven-year period over which these studies were carried out, Pune was transformed from a quiet administrative and educational center with a few isolated, relatively low technology factories, employing mostly unskilled and semi-skilled laborers, into a major manufacturing city with a substantial number of large-scale factories producing a diverse set of products, requiring high technology and a skilled work force. At the same time there was what is referred to as the Pune urb
