

1. Record Nr.	UNINA9910796082203321
Autore	Howe Kerry J
Titolo	Principles of water treatment [[electronic resource] /] / Kerry J. Howe ... [et al.]
Pubbl/distr/stampa	Hoboken, : Wiley, 2012
ISBN	1118309677 9781118309674
Descrizione fisica	xvii, 654 p. : ill
Disciplina	628.1/62
Soggetti	Water - Purification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: PrefaceAcknowledgmentsChapter 1 Introduction1-1 The Importance of Principles1-2 The Importance of SustainabilityReferencesChapter 2 Water Quality and Public Health2-1 Relationship between Water Quality and Public Health2-2 Source Waters for Municipal Drinking Water Systems2-3 Regulations of Water Treatment in the United States2-4 Evolving Trends and Challenges in Drinking Water Treatment2-5 Summary and Study GuideReferencesChapter 3 Process Selection3-1 Process Selection Based on Contaminant Properties3-2 Other Considerations in Process Selection3-4 Design and Selection of Process Trains3-5 Summary and Study GuideHomework ProblemsReferencesChapter 4 Fundamental Principles of Environmental Engineering4-1 Units of Expression for Chemical Concentrations4-2 Chemical Equilibrium4-3 Chemical Kinetics4-4 Reactions Used in Water Treatment4-5 Mass Balance Analysis4-6 Introduction to Reactors and Reactor Analysis4-7 Reactions in Batch Reactors4-8 Hydraulic Characteristics of Ideal Flow Reactors4-9 Reactions in Ideal Flow Reactors4-10 Measuring the Hydraulic Characteristics of Flow Reactors with Tracer Tests4-11 Describing the Hydraulic Performance of Real Flow Reactors4-12 Reactions in Real Flow Reactors4-13 Introduction to Mass Transfer4-14 Molecular Diffusion4-15 Diffusion Coefficients4-16 Models and Correlations for Mass Transfer at an Interface4-17 Evaluating the Concentration Gradient with Operating Diagrams4-18 Summary and

Study Guide Homework Problems References Chapter 5 Coagulation and Flocculation 5-1 Role of Coagulation and Flocculation in Water Treatment 5-2 Stability of Particles in Water 5-3 Theory of Coagulation 5-4 Coagulation Practice 5-5 Principles of Mixing for Coagulation and Flocculation 5-6 Rapid Mix Practice 5-7 Theory of Flocculation 5-8 Flocculation Practice 5-9 Energy and Sustainability Considerations 5-10 Summary and Study Guide Homework Problems References Chapter 6 Sedimentation 6-1 Principles of Discrete (Type I) Particle Settling 6-2 Discrete Settling in Ideal Sedimentation Basins 6-3 Principles of Flocculant (Type II) Particle Settling 6-4 Principles of Hindered (Type III) Settling 6-5 Conventional Sedimentation Basin Design 6-6 Alternative Sedimentation Processes 6-7 Physical Factors Affecting Sedimentation 6-8 Energy and Sustainability Considerations 6-9 Summary and Study Guide Homework Problems References Chapter 7 Rapid Granular Filtration 7-1 Physical Description of a Rapid Granular Filter 7-2 Process Description of Rapid Filtration 7-3 Particle Capture in Granular Filtration 7-4 Head Loss through a Clean Filter Bed 7-5 Modeling of Performance and Optimization 7-6 Backwash Hydraulics 7-7 Energy and Sustainability Considerations 7-8 Summary and Study Guide Homework Problems References Chapter 8 Membrane Filtration 8-1 Classification of Membrane Processes 8-2 Comparison to Rapid Granular Filtration 8-3 Principal Features of Membrane Filtration Equipment 8-4 Process Description of Membrane Filtration 8-5 Particle Capture in Membrane Filtration 8-6 Hydraulics of Flow through Membrane Filters 8-7 Membrane Fouling 8-8 Sizing of Membrane Skids 8-9 Energy and Sustainability Considerations 8-10 Summary and Study Guide Homework Problems References Chapter 9 Reverse Osmosis 9-1 Principal Features of a Reverse Osmosis Facility 9-2 Osmotic Pressure and Reverse Osmosis 9-3 Mass Transfer of Water and Solutes through RO Membranes 9-4 Performance Dependence on Temperature and Pressure 9-5 Concentration Polarization 9-6 Fouling and Scaling 9-7 Element Selection and Membrane Array Design 9-8 Energy and Sustainability Considerations 9-9 Summary and Study Guide Homework Problems References Chapter 10 Adsorption and Ion Exchange 10-1 Introduction to the Adsorption Process 10-2 Adsorption Equilibrium 10-3 Adsorption Kinetics 10-4 Introduction to the Ion Exchange Process 10-5 Ion Exchange Equilibrium 10-6 Ion Exchange Kinetics 10-7 Fixed Bed Contactors 10-8 Suspended Media Reactors 10-9 Energy and Sustainability Considerations 10-10 Summary and Learning Objectives 10-11 Homework Problems References Chapter 11 Air stripping and aeration 11-1 Types of Air Stripping and Aeration Contactors 11-2 Gas-Liquid Equilibrium 11-3 Fundamentals of Packed Tower Air Stripping 11-4 Design and Analysis of Packed Tower Air Stripping 11-5 Energy and Sustainability Considerations 11-6 Summary and Study Guide Homework Problems References Chapter 12 Advanced Oxidation 12-1 Introduction to Advanced Oxidation 12-2 Ozonation as an Advanced Oxidation Process 12-3 Hydrogen Peroxide/Ozone Process 12-4 Hydrogen Peroxide/UV Light Process 12-5 Energy and Sustainability Considerations 12-6 Summary and Study Guide Homework Problems References Chapter 13 Disinfection 13-1 Disinfection Agents and Systems 13-2 Disinfection with Free and Combined Chlorine 13-3 Disinfection with Chlorine Dioxide 13-4 Disinfection with Ozone 13-5 Disinfection with Ultraviolet Light 13-6 Disinfection Kinetics 13-7 Disinfection Kinetics in Real Flow Reactors 13-8 Design of Disinfection Contactors With Low Dispersion 13-9 Disinfection Byproducts 13-10 Residual Maintenance 13-11 Energy and Sustainability Considerations 13-12 Summary and Study Guide Homework

ProblemsReferences14 Residuals Management14-1 Defining the Problem14-2 Physical, Chemical, and Biological Properties of Residuals14-3 Alum and Iron Coagulation Sludge14-4 Liquid Wastes From Granular Media Filters14-5 Management of Residual Liquid Streams14-6 Management of Residual Sludge14-7 Ultimate Reuse and Disposal of Semisolid Residuals14-8 Summary and Study GuideHomework ProblemsReferencesAppendix A Conversion FactorsAppendix B Physical Properties of Selected Gases and Composition of AirB-1 Density of Air at Other TemperaturesB-2 Change in Atmospheric Pressure with ElevationAppendix C Physical Properties of WaterAppendix D Periodic TableAppendix E Electronic Resources available on the John Wiley and Sons website for this TextbookIndex.

---

Sommario/riassunto

"An abridgement of the reference work Water Treatment, 3rd Edition by the same team of authors, this Student Edition maintains the same quality writing, illustrations, and worked examples as the larger book, but in a more manageable and inexpensive format. All topics are discussed from the ground up, from the basic fundamentals of water chemistry, to filtration, to the design of treatment trains. Designed specifically for civil or environmental engineering students, this edition includes end-of-chapter review questions, chapter summaries, a new glossary, and a solutions manual available online"--
