Sommario/riassunto

The first two years of life are a period of unparalleled growth and change. Within a state-of-the-art biopsychosocial framework, this innovative volume explores the multiple contexts of infant development--the ways in which genes, neurobiology, behavior, and environment interact and shape each other over time. Methods for disentangling, measuring, and analyzing complex, nonlinear developmental processes are presented. Contributors explore influences on the infant's growth in major domains, including cognitive and socioemotional functioning and mental health. The consequences of family stress,

Sommario/riassunto

This book provides readers with a unique opportunity to learn about one of the new regional trade agreements (RTAs), the China-Australia Free Trade Agreement (ChAFTA), that has been operational since December 2015 and is now at the forefront of the field. This new agreement reflects many of the modern and up-to-date approaches within the international economic legal order that must now exist within a very different environment than that of the late eighties and early nineties, when the World Trade Organization (WTO) was created. The book, therefore, explores many new features that were not present when the WTO or early RTAs were negotiated. It provides insights and lessons about new and important trade issues for the twenty-first century, such as the latest approaches to the regulation of investment, twenty-first century services and the emerging digital/knowledge economy. In addition, this book provides new understandings of the latest RTA approaches of China and Australia. The book's contributors, all foremost experts on their subject matter within this field, explore the inclusion of many traditional trade and investment agreement features in the ChAFTA, showing their continuing relevance in modern contexts
