amount paid by the Third Reich to beneficiaries in respect of death in service in the Blue Division -- 12 Articles of the German-Spanish Convention of May 1962 on benefits derived from service in the Blue Division -- 13 List of the number of beneficiaries by year and pension supplements paid by Germany between 1965 and 1994 to the disabled of the Blue Division, and total amounts paid -- Notes -- Primary Sources -- Bibliography -- Index.
Back Cover.

Sommario/riassunto

This book, translated from the original Spanish, is the primary academic and historical study of the Blue Division-a Falangist initiative involving the dispatch of some 40,000 Spanish combatants (more than a half of whom paid with their lives, health, or liberty) to the Russian Front during the Second World War. Xavier Moreno Julia does not limit himself to relating their deeds under arms, but also analyzes the political background in detail: the complex relations between the Spanish government and Hitler's Germany; the internal conflicts between the Falangists and the Army; the rise and fall of Franco's brother-in-law, Minister Ramon Serrano Suner, who inspired the Blue Division and became the second most powerful person in Spain; and the attitude of General Agustin Munoz Grandes, commander of the Blue Division, who was encouraged by Berlin to seriously consider the possibility of taking over the reins of Spanish power. This book, based on massive documentation in German, British, and Spanish archives, is an essential source of information to understand Spain in the 1940s-an epoch when the Caudillo's power and the regime's good fortune were less secure than is often believed.

Sommario/riassunto	Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in <i>Nursing Staff in Hospitals and Nursing Homes</i> , a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and

presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel--and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system.
