

1. Record Nr.	UNINA9910796503403321
Titolo	Bilingualism : a framework for understanding the mental lexicon // edited by Maya Libben, Mira Goral, Gary Libben
Pubbl/distr/stampa	Amsterdam, [Netherlands] ; ; Philadelphia, [Pennsylvania] : , : John Benjamins Publishing Company, , 2017 ©2017
Descrizione fisica	1 online resource (272 pages) : illustrations
Collana	Bilingual Processing and Acquisition, , 2352-0531
Disciplina	404.2
Soggetti	Bilingualism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Prologue: polyglossia as a personal journey / Gonia Jarema -- The dynamic lexicon: complex words in bilingual minds / Maya Libben, Mira Goral and Gary Libben -- Languages without borders: reframing the study of the bilingual mental lexicon / Jyotsna Vaid and Renata F.I. Meuter -- The bilingual lexicon: a window into language dynamics and cognition / Judith F. Kroll -- Mechanisms underlying word learning in second language acquisition / Gabriela Meade and Ton Dijkstra -- The bilingual mental lexicon: a dynamic knowledge system / Ladan Ghazi Saidi, Tanya Dash and Ana Ines Ansaldo -- Non-selective language activation and bilingualism as the default mental lexicon / Maya Libben -- The influence of contextual cues on representations in the mental lexicon for bilinguals / Kalinka Timmer, John G. Grundy and Ellen Bialystok -- When cognate status produces no benefits: investigating cognate effects during the processing of code-switched sentences / Paola E. Dussias, Jorge R. Valdes Kroff and Rosa E. Guzzardo Tamargo -- Lexical retrieval difficulty in bilingual speakers with and without pathology / Mira Goral -- Morphological integration and the bilingual lexicon / Gary Libben, Mira Goral and Harald Baayen -- Morphological processing in old-age bilinguals / Harald Clahsen and Jana Reifegerste.
Sommario/riassunto	"In the world today, bilingualism is more common than monolingualism. Thus, the default mental lexicon may in fact be the

bilingual lexicon. More than ever, social and technological innovation have created a situation in which lexical knowledge may change dramatically throughout an individual's lifetime. This book offers a new perspective for the understanding of these phenomena and their consequences for the representation of words in the mind and brain."
