

1. Record Nr.	UNINA9910796528403321
Autore	Wilcox Sherman
Titolo	Ten lectures on cognitive linguistics and the unification of spoken and signed languages // by Sherman Wilcox
Pubbl/distr/stampa	Leiden, The Netherlands ; ; Boston, [Massachusetts] : , : Brill, , 2018 ©2018
ISBN	90-04-33677-X
Descrizione fisica	1 online resource (452 pages) : illustrations (some color)
Collana	Distinguished Lectures in Cognitive Linguistics, , 2468-4872
Disciplina	415.01835
Soggetti	Cognitive grammar Sign language
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Preliminary Material -- Overview of Signed Languages -- Signed Language Linguistics -- Overview of Cognitive Grammar -- Cognitive Iconicity, Conceptual Spaces, Meaning, and Gesture -- Cognitive Grammar and Signed Languages -- Language and Gesture -- Two Routes from Gesture to Language -- Setting Language in Motion -- Dynamic Systems Theory -- Neural Darwinism, Neuroscience, and Cognitive Grammar -- References -- Websites for Cognitive Linguistics and cifcl Speakers -- Appendix.
Sommario/riassunto	In Ten Lectures on Cognitive Linguistics and the Unification of Spoken and Signed Languages Sherman Wilcox suggests that rather than abstracting away from the material substance of language, linguists can discover the deep connections between signed and spoken languages by taking an embodied view. This embodied solution reveals the patterns and principles that unite languages across modalities. Using a multidisciplinary approach, Wilcox explores such issues as the how to apply cognitive grammar to the study of signed languages, the pervasive conceptual iconicity present throughout the lexicon and grammar of signed languages, the relation of language and gesture, the grammaticization of signs, the significance of motion for understanding language as a dynamic system, and the integration of cognitive neuroscience and cognitive linguistics.
