Practices -- CHAPTER 10 Technological Advance, Transatlantic Trade, External Equilibrium: American Financial Assistance to the Italian Nuclear Power Programmes from the 1960s through to the First Oil Crisis -- CHAPTER 11 Capital Hits the Road: Regulating Multinational Corporations during the Long 1970s -- CHAPTER 12 Marketization of the Enterprise: The Influence of Consultancy in the German Fibre Industry after the Boom -- CHAPTER 13 From Mutual Society to Public Corporation: The Case of the Halifax Building Society -- Index

Sommario/riassunto

Few would dispute that many Western industrial democracies undertook extensive deregulation in the 1970s and 1980s. Yet this narrative, in its most familiar form, depends upon several historiographical assumptions that bely the complexities and pitfalls of studying the recent past. Across thirteen case studies, the contributors to this volume investigate this “deregulatory moment” from a variety of historical perspectives, including transnational, comparative, pan-European, and national approaches. Collectively, they challenge an interpretive framework that treats individual decades in isolation and ignores broader trends that extend to the end of the Second World War.
