Nota di contenuto	Prelims -- Institutional and political issues in the policy framework of the Eurozone -- Monetary policy, the banking system and financial integration -- Macroeconomic imbalances and the convergence process -- About the authors -- Index.
Sommario/riassunto	This book offers a criticalperspective from which to observe evolution of the Euro Area and the European Union in these times of growing economic and political conflict. Key implications of design failures in the Euro Area (i.e. incorrect diagnostics ofthe public finance crisis, single monetary policy failure, heterogeneous macroeconomic environment, asymmetry in macroeconomic policies, obstacles forpolicy coordination) and their contribution to the excessive external andinternal economic imbalances will be critically discussed from the economic, policy and institutional perspectives. This critical insight is used to examineboth institutional asset and economic performance of Europe after the crisis, moving from the authors' shared perspective that the crisis revealed the weakaspects of the whole architecture of the European Union. The economic crisis revealed theexistence of different forms of imbalances inside the Eurozone and highlighted the flaws of the institutional architecture of economic policy in Europe. The greater

fragility of some countries in respect to others has triggered a backward process in which national interests have started to prevail over those of both the currency area and the entire European Union. In turn, this has fuelled a progressive decline in confidence in the European institutions and is creating growing questions of interpretation both in terms of economic theory and institutional asset. This book focuses on these issues and on the degree of legitimacy of the European institutions resulting therefrom. It aims to investigate the nature and validity of the European integration process emphasizing limits and challenges arising from it.

Sommario/riassunto

This book is a powerful and moving account of the experiences of 13 people with learning disabilities who were living with cancer. The author gained a unique understanding of what it is like for individuals with learning disabilities to live with deteriorating health and how this may impact upon their families, friends and carers.
