Sommario/riassunto	As a genre situated at the crossroad of rhetoric and fiction declamation offers the freedom to experiment with new forms of discourse. Placing the literariness of declamation into the spotlight, this volume showcases declamation as a realm of genuine literary creation with its own theoretical underpinning, literary technique and generic conventions. Focusing on the oeuvre of Calpurnius Flaccus this volume demonstrates that these texts constitute a genre on their own, the rhetorical and

literary framework of which remains not yet fully mapped. Contributions from an international group of leading scholars from the field of Roman Literature and Rhetoric will explore the question of how Roman Declamation functions as a literary genre. This volume investigates the literary technique and the generic conventions of declamatio in its social, pedagogical and ethical context to determine "the poetics" of Roman Declamation. This volume is of interest to students and scholars of Rhetoric and Roman Literature. If you are interested in Roman Declamation, we also recommend the volume on the Declamations Ascribed to Quintilian by the same editors to you.

Sommario/riassunto

How the massive power shift in Russia threatens the political dominance of the United States There is a new cold war underway, driven by a massive geopolitical power shift to Russia that went almost unnoticed across the globe. In *The Colder War: How the Global Energy Trade Slipped from America's Grasp*, energy expert Marin Katusa takes a look at the ways the western world is losing control of the energy market, and what can be done about it. Russia is in the midst of a rapid economic and geopolitical renaissance under the rule of Vladimir Putin, a tenacious KGB officer turned modern-day tsar. U
