Record Nr.	UNINA9910796574603321
Titolo	The speech processing lexicon : neurocognitive and behavioral approaches / / edited by Aditi Lahiri and Sandra Kotzor
Pubbl/distr/stampa	Berlin, [Germany] ; ; Boston, [Massachusetts] : , : De Gruyter Mouton, , 2017 ©2017
ISBN	3-11-042265-4
Descrizione fisica	1 online resource (258 pages)
Collana	Phonology and Phonetics, , 1861-4191 ; ; Volume 22
Disciplina	401.95
Soggetti	Speech perception Psycholinguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Frontmatter Table of Contents Introduction Phonetic categories and phonological features: Evidence from the cognitive neuroscience of language On invariance: Acoustic input meets listener expectations The invariance problem in the acquisition of non-native phonetic contrasts: From instances to categories Symmetry or asymmetry: Evidence for underspecification in the mental lexicon Talker-specificity effects in spoken language processing: Now you see them, now you don't Processing acoustic variability in lexical tone perception Flexible and adaptive processes in speech perception Foreign accent syndrome: Phonology or phonetics? How category learning occurs in adults and children Automatic speech recognition: What phonology can offer Fluid semantics: Semantic knowledge is experience-based and dynamic Subject index
Sommario/riassunto	In this book, some of today's leading neurolinguists and psycholinguists provide insight into the nature of phonological processing using behavioural measures, computational modeling, EEG and fMRI. The essays cover a range of topics including categorization, acoustic variability and invariance, underspecification, talker-specificity and machine learning, focusing on the acoustics, perception, acquisition and neural representation of speech.
