

1. Record Nr.	UNINA9910796610303321
Autore	Jia Ying
Titolo	Low-dimensional materials and applications // Ying Jia, Guogen Xu, Xuanjun Wang ; translated by Zhiyong Huang [and three others]
Pubbl/distr/stampa	Berlin, [Germany] ; ; Boston, [Massachusetts] : , : De Gruyter, , 2018 ©2018
ISBN	3-11-042485-1
Descrizione fisica	1 online resource (368 pages) : illustrations
Disciplina	620.193
Soggetti	Carbon Carbon composites Graphene
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Frontmatter -- Preface -- Contents -- 1. Basic properties of lightweight carbon materials -- 2. Preparation and properties test for lightweight carbon composite materials -- 3. Application of lightweight carbon material and its composite in national defense environmental protection -- 4. Application of lightweight carbon material and composite material in electromagnetic wave absorbing material -- 5. Application of lightweight carbon materials and composites in protective materials -- 6. Future development -- Index
Sommario/riassunto	Low-dimensional Materials and Applications systematically introduces the preparation and performance of low-dimensional materials, such as carbon fiber, carbon nanotubes, graphene etc, as well as their applications in environmental pollution control, electronics, coating industry and defense technologies. Written with a practical focus and containing abundant examples, it is well suited for both researchers and engineers.
