Sommario/riassunto

In *Slaving Zones: Cultural Identities, Ideologies, and Institutions in the Evolution of Global Slavery*, fourteen authors—including both world-leading and emerging historians of slavery—engage with the ‘Slaving Zones’ theory. This theory has recently taken the field of Mediterranean slavery studies by storm, and the challenge posed by the editors was to see if the ‘Slaving Zones’ theory could be applied in the wider context of long-term global history. The results of this experiment are promising. In the Introduction, Jeff Fynn-Paul points out over a dozen ways in which the contributors have added to the concept of ‘Slaving Zones’, helping to make it one of the more dynamic theories of global slavery since the advent of Orlando Patterson’s *Slavery and Social Death*.
