Soggetti	Eye Diseases - diagnosis Diagnostic Techniques, Ophthalmological Ophthalmology Eye - Diseases Case Reports Examination Questions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	"The book is designed to assist the ophthalmology physician candidate who is preparing for the ophthalmology oral board examination. The Osler Review Course is the most highly-touted method of practicing for the boards, and the style of presentation for this title is the same style that Dr. Luviano uses to teach Mock Oral Examinations at the Osler Review Course. The book provides a wide example of cases in across all sub-topics covered by the oral exams, and presents them in a manner that is concise, intelligent, and appropriate for the case presented. There are 100 cases covering the major subtopics: Optics, Neuro-ophthalmology & Orbit, External Eye and Adnexa, Anterior Segment of the Eye, Posterior Segment of the Eye, and Pediatrics & Strabismus. Each case will be accompanied by at least one image and an audio clip" --Provided by publisher.
