Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Acknowledgments -- Contents -- Introduction -- Terra Italia -- Genesis of a Symbolic Shape -- Italic Institutions -- Italic Identity in the Roman Republic -- Conclusion -- Bibliography -- Index
Sommario/riassunto	Scholarship has widely debated the question about the existence of an 'Italian identity' in the time of the Roman Republic, basing on the few sources available and on the outcomes of the Augustan and imperial age. In this sense, this debate has for a long time been conducted without sufficient input from social sciences, and particularly from social geography, which has developed methodologies and models for the investigation of identities. This book starts therefore from the consideration that Italy came to be, by the end of the Republic, a region within the Roman imperium, and investigates the ways this happened and its consequences on the local populations and their identity structures. It shows that Italy gained a territorial and symbolic shape, and own institutions defining it as a territorial region, and that a regional identity developed as a consequence by the 2nd century BCE. The original, interdisciplinary approach to the matter allows a consistent revision of the ancient sources and sheds new light on the

topic, providing important reflections for future studies on the subject.
