Sommario/riassunto	Time and Transformation in Architecture , edited by Tuuli Lähdesmäki, approaches architecture and the built environment from an interdisciplinary point of view by emphasizing in its theoretical discussions and empirical analysis the dimensions of time, temporality, and transformation—and their relation to human experiences, behavior,

and practices. The volume consists of seven chapters that explore the following questions: How do architectural ideas, ideals, and meanings emerge, develop, and transform? How is architecture manifested in relation to time, time-space, and the social dimensions it entails and produces? The volume provides both multifaceted theoretical discussions on time and temporality in architecture and empirical case studies around the globe in which these theories and conceptualizations are tested and explored. Contributors are Eiman Ahmed Elwidaa, André van Graan, June Jordaan, Joongsub Kim, Tuuli Lähdesmäki, Assumpta Nhaggenda-Musana, Sanja Rodeš and Smaranda Spânu.
