

1. Record Nr.	UNINA9910796716203321
Titolo	Urbanization and slums : infectious diseases in the built environment : proceedings of a workshop // V. Ayano Ogawa, Cecilia Mundaca Shah, and Anna Nicholson, rapporteurs
Pubbl/distr/stampa	Washington, DC : , : The National Academies Press, , [2018] ©2018
ISBN	0-309-47442-6 0-309-47440-X
Descrizione fisica	1 online resource (149 pages)
Disciplina	614.5
Soggetti	Communicable diseases - Epidemiology Developing countries
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Acronyms and abbreviations -- Introduction -- Perspectives on the prevention and control of infectious diseases in an urban and interconnected world -- Understanding infectious disease transmission in urban built environments -- Translating conceptual models of infectious disease transmission and control into practice -- Achieving sustainable and health promoting urban built environments -- Bridging drivers and interventions to scale up successful practices -- Appendixes.
Sommario/riassunto	"The urban built environment is a prime setting for microbial transmission, because just as cities serve as hubs for migration and international travel, components of the urban built environment serve as hubs that drive the transmission of infectious disease pathogens. The risk of infectious diseases for many people living in slums is further compounded by their poverty and their surrounding physical and social environment, which is often overcrowded, is prone to physical hazards, and lacks adequate or secure housing and basic infrastructure, including water, sanitation, or hygiene services. To examine the role of the urban built environment in the emergence and reemergence of infectious diseases that affect human health, the

National Academies of Sciences, Engineering, and Medicine planned a public workshop. This publication summarizes the presentations and discussions from the workshop"--Publisher's description.
