1.	Record Nr.	UNINA9910796782703321
	Titolo	Empirical approaches to the phonological structure of words / / edited by Christiane Ulbrich, Alexander Werth and Richard Wiese
	Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter, , 2018
	ISBN	3-11-054064-9
		3-11-054289-7
	Descrizione fisica	1 online resource (vi, 277 pages) : illustrations
	Collana	Linguistische Arbeiten ; ; Volume 567
	Disciplina	412
	Soggetti	Word (Linguistics)
		Grammar, Comparative and general - Phonology, Comparative
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia

Sommario/riassunto

One of the basic grammatical categories in linguistics is the phonological word. But how are words made up in terms of their sounds? And how is the information on the sound structure of words used in the processing of words? The multidimensionality of the phonological word relates it to semantics, morphology, phonology and syntax. It is nevertheless a category that has only been an object of serious study since the prosodic turn in phonology and thus cannot be considered an established category of grammatical description. This volume brings together scholars interested in the complex relations of the phonological word, applying different empirical approaches.
