

1. Record Nr.	UNINA9910796923003321
Autore	Jackson Jeremy B. C.
Titolo	Breakpoint : Reckoning with America's Environmental Crises // Steve Chapple, Jeremy B. C. Jackson
Pubbl/distr/stampa	New Haven, CT : , : Yale University Press, , [2018] ©2018
ISBN	0-300-23503-8
Descrizione fisica	1 online resource (xvi, 296 pages) : illustrations, maps
Disciplina	363.700973
Soggetti	Environmental policy - United States Environmental degradation - United States Environmental disasters - United States Ecology - Economic aspects - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 205-275) and index.
Nota di contenuto	Front matter -- CONTENTS -- PREFACE -- ACKNOWLEDGMENTS -- BREAKPOINT -- PART I. Heartland -- One. Corn Off the Cob -- Two. Food versus Fuel -- Three. Where's the Food? -- Four. Don't Drink That! -- PART II. Coast -- Five. Delta Dawn -- Six. Blue Bayou -- Seven. The Fate of a Great City -- PART III. Too Little Water and Too Much -- Eight. Sea Level Rise Is Dangerous -- Nine. Retreat from the Coasts -- Ten. Agriculture in Crisis -- Eleven. Reinventing Agriculture -- Epilogue: America at the Crossroads -- Notes -- Index
Sommario/riassunto	An insightful look at the American environmental crisis and emerging solutions from the heartland to the coasts in the era of global climate change Eminent ecologist Jeremy B. C. Jackson and award-winning journalist Steve Chapple traveled the length of the Mississippi River interviewing farmers, fishermen, scientists, and policymakers to better understand the mounting environmental problems ravaging the United States. Along their journey, which quickly expands to California, Florida, and New York, the pair uncovered surprising and profound connections between ecological systems and environmental crises across the country. Artfully weaving together independent research and engaging storytelling, Jackson and Chapple examine the looming

threats from recent hurricanes and fires, industrial agriculture, river mismanagement, extreme weather events, drought, and rising sea levels that are pushing the country toward the breaking point of ecological and economic collapse. Yet, despite these challenges, the authors provide optimistic and practical solutions for addressing these multidimensional issues to achieve greater environmental stability, human well-being, and future economic prosperity. With a passionate call to action, they look hopefully toward emerging and achievable solutions to preserve the country's future.

Livello bibliografico	Monografia
Sommario/riassunto	This book presents 27 operational techniques useful for making the practice of reading aloud as effective as possible in the educational structures dealing with children up to 6 years of age, by following a bottom-up approach. The methodological proposals are organised in three sections: Gaining and Developing Attention, Creating Interest in Stories and Encouraging Participation and Book Culture. The research took into account hundreds of suggestions formulated by scholars, educators and teachers who are experts in reading aloud, as well as by a group of researchers. It explored the specialised bibliography and websites dedicated to reading aloud and involved, through interviews, educators and teachers of nursery schools and preschools from the 35 Education Zones of the Region of Tuscany. The aim is to promote, in all

children and youth, the development of the basic skills needed to  
achieve academic success of each and every one.
